DETAILED ACTION***Allowable Subject Matter***

1. Claims 37-40, 48-51, 59-62 and 97-106 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest "selection of a genre setup button on a graphical user interface displayed at the personal computer". The specification also limits the invention to selection of a genre from a menu (*my channel genre screen 90*, Fig. 15 as an example) displayed in response to selection of said genre setup button. Functionally, this limitation (in all four independent claims) means the "genre setup button" is selected at the GUI (Fig. 14 as an example) of the "creator" PC ("PC 2" in the specification) and not selected at a computer belonging to any member of the "business alliance". See Fig. 2 (the "business alliance" is item 8 therein), 14 and 15, and para. [0085]-[0088] and [0145]-[0147] in the PGPub (US 20020046097A1).¹
3. The invention is intended to provide creators with more control over their works. "Genre" is the category of a work of authorship. "Creator" means the author of said work of authorship. The work of authorship is called "the [user] content data" in the claims. In the spec., "user" generally means the creator/author. The content recipient is generally the "client". "Client location" means the client's computer ("PC 4" in the spec.).
4. Skaanning (US007385716B1) teaches author selection of a *category button 65*. The examiner gave patentable weight to "genre". Skaanning does not read on the claim limitation because the author in Skaanning is selecting categories of potential *problems* with the (software) work of authorship, not categorizing (i.e., selecting the genre of) the work itself. Even if Skaanning was construed to read on the allowable limitation, there is no logic by which one of ordinary skill in the art would find it obvious to add Skaanning to the best prior art, which was used in the last Office action (mailed 29 October 2009). The closest additional prior art is McCartney et al. (US 20020010716A7). McCartney teaches the author inputting content *Topic(s)* (Fig. 7 items 705 and 706), which reads on content "genre", but does not teach "selection of a genre setup button" and does not teach selection of a genre from a menu.

¹ This supporting material is at pp. 13-14 and 27-28 in the "substitute specification clean copy" filed on 17 May 2006.

Art Unit: 3688

5. Although it does not bear on patentability, dependent claims to three of the four variants of the instant invention require interpretation. All the independent claims 37, 48, 59 and 97 are limited to transmitting the selected content "with a *commercial*". However, dependent claim pairs 38/39, 49/50 and 60/61 further limit the first three (all but claim 97) to a request from the client to "include/exclude advertising data from the selected content data". This language was introduced in an amendment filed 27 September 2004 that replaced the original claims 1-36 with new claims 37-96. The examiner could not find explicit support for this language in the application as filed. However, the application does disclose that the client may request content data which inherently includes and can exclude advertising² (e.g., respectively *products for sale* and *music* disclosed at para [0077] and [0082] of the application's PGPub), so the six dependent claims are supported inherently.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald L Champagne whose telephone number is 571-272-6717.
